

SOLVAir® Breeze

SO₃

Trona

SO₂

Sodium Bicarbonate

HCl

**From the earth to the sky...
Trona is the natural way to clean
the air.**

SOLVAir® Select 200 trona is a naturally occurring mineral mined in Green River, Wyoming by Solvay Chemicals, Inc. When used to treat acid pollutants occurring in flue gases, this underground mineral helps clean the air. Utilizing simple chemistry, [Select 200](#) efficiently and cost-effectively removes a variety of acid gases such as SO₂, SO₃ or HCl.

Used in a low capital cost injection system, Select 200 effectively demonstrates the ability to remove over 90% of the acid gases present. [Power plants](#), both large and small, have turned to the SOLVAir Group and its line of products to fight for cleaner air.

For more detailed information on SOLVAir Select 200 trona and how it cleans acid gas in the stacks, go to www.solvair.us, or e-mail michael.wood@solvay.com.
