We want to know...

Does the Breeze work for you?

Since our first SOLVAir Breeze e-newsletter was published in 2008, we have received many positive comments as to its subject matter.

Now, we want your opinion as to what matters most to you: what YOU wish to see addressed in future issues. We've covered air pollutants from SO₂, SO₃, and NO_x to HCl, HF and Hg... and the efficiency of SOLVAir Select 200 trona and Select 300 sodium bicarbonate in the removal of these pollutants. As well, we've discussed Dry Sorbent Injection as an efficient and cost-effective air pollution control system.

To better serve you, we'd like to know your company's specific needs and requirements. Please take a very short moment to fill in the attached confidential survey (8 questions) and return it to me. The importance of your input cannot be understated, and full confidentiality will of course be observed.

[Click here](#) for the SOLVAir Breeze Survey. And thank you in advance for your input and help!
